

SCORPION 1210PCU

Cambelt's Portable Car Unloader Scorpion 1210PCU is among our most durable and versatile unloaders. It features one of the smallest footprints in the industry while offering load rates up to 1,350 cubic feet per hour.

- Just under 20' centerline to centerline.
- Able to provide over 14 feet of loading clearance, making it capable of loading a 14-foot truck.
- Enclosed conveyor system to minimize material loss and environmental impact.
- Fitted with Cambelt's monolithic CB1210 belt
- Rated for material sizes to .75".
- Base price under 33K.

CAMBELT'S UNIQUE CONVEYOR SYSTEM

In spite of its minimal footprint, Cambelt' monolithic CB1210 belt is perfectly engineered for high speed and high load capacity on conveyor inclines of 60 degrees.

- Sidewalls and hefty nubs keep material moving upward for unmatched efficiency and continuous flow.
- No glued-on sidewalls and no glued-on cleats prevents delaminated sides or nubs
- Minimized down-time and production loss due to costly repairs.

ADDITIONAL OPTIONS

Our base model is capable of handling most jobs requiring a portable car unloader. Some additional options include:

- Clearance capable of center loading 16'-1" railcar
- Hydraulic system powered by gas or diesel engine for remote site operations
- Dust collection system
- Clutch controlled snorkel
- Drive over Slimline tail section
- 3-phase electric hopper vibrators
- Emergency spare parts kit
